

## db Populatie

**Inhoud** De databank Populatie bevat demografische, sociaal-economische en zorggegevens over de leden van de 7 Belgische ziekenfondsen. De gegevens zijn beschikbaar in afzonderlijke datasets per kalenderjaar. Er is ook een [EPS](#)-variant van de databank.

**Dekking**

- **Verzekerde inwoners van België**  
Een Populatie-dataset van jaar Y omvat alle personen die in dat jaar aangesloten zijn bij een van de zeven Belgische ziekenfondsen voor hun verplichte verzekering voor gezondheidszorgen. In principe zijn dit alle inwoners geregistreerd in het Rijksregister. In de FAQ hieronder vindt u een overzicht van de (kleine) afwijkingen ten opzichte van het Rijksregister.
- **Verzekerden via internationale verdragen**  
Indien u dit wenst, kan u tevens informatie opvragen over personen die verzekerd zijn in het buitenland en dankzij een internationaal verdrag gekend zijn bij een Belgisch ziekenfonds. Deze subpopulatie wordt niet standaard toegevoegd wanneer u IMA-data aanvraagt en de beschikbare informatie over deze personen is beperkt. In de beschrijving van de variabele [Code Gerechtigde 2](#) vindt u meer informatie over deze subpopulatie.
- **FAQ: Bevat de databank Populatie dezelfde personen als het Belgisch Rijksregister?**  
Niet helemaal. Omdat in België een verzekeringsplicht bestaat, omvat een dataset Populatie in principe alle inwoners die voorkomen in het Rijksregister van het betreffende jaar. In werkelijkheid komt de databank Populatie slechts voor ca. 98% overeen met het Rijksregister. Een aantal groepen, zoals grensarbeiders en werknemers van internationale instellingen, mogen zich aansluiten bij een niet-Belgisch ziekenfonds. In dat geval komen zij niet voor in de dataset. Anderzijds bevat de dataset ook een beperkt aantal personen die geen officieel inwoner van België zijn, zoals buitenlandse studenten, asielzoekers en grensarbeiders uit een buurland. Hierdoor vertoont de databank in sommige regio's een over- of ondervertegenwoordiging ten opzichte van het Rijksregister, in het bijzonder in Brussel en de grensgemeenten.

**Referentieperiode** De variabelen in de databank hebben betrekking op de situatie van de persoon op 31 december van het betreffende jaar. Indien de persoon op dat ogenblik niet meer ingeschreven is bij een Belgisch ziekenfonds, bijvoorbeeld omdat hij/zij verhuisd of overleden is, wordt de situatie op 30 juni van het jaar weergegeven. Sommige variabelen hebben betrekking op het volledige referentiejaar of een specifieke periode van het jaar. Deze informatie vindt u in de uitleg van de betreffende variabele.

**Beschikbaarheid**

- De eerste versie (vs1) van de dataset van jaar Y wordt in augustus van jaar Y+1 beschikbaar gesteld. Indien u deze versie wenst te gebruiken, dient u ermee rekening te houden dat sommige variabelen gebaseerd zijn op onvolledige gegevens. Deze waarschuwing wordt herhaald in de uitleg van de betreffende variabelen.
- De tweede versie (vs2) van de dataset van jaar Y wordt in november van jaar Y+2 beschikbaar gesteld. Dit is de definitieve versie die gebaseerd is op volledige informatie.
- Opmerking. Voor zeer urgente analyses van het voorbije jaar kan ook een een preliminaire versie van de dataset beschikbaar worden gesteld. Deze versie van jaar Y is klaar in mei van jaar Y+1. De informatie in deze versie is nog onvolledig en geeft de situatie van de persoon weer op 30 juni van het betreffende jaar.

**Productie**

Twee maal per jaar maakt elk ziekenfonds een lijst op van haar leden. Dit gebeurt op 30 juni en op 31 december. Van deze leden wordt een hele reeks demografische, sociaal-economische en zorgvariabelen opgeslagen en doorgegeven aan het IMA.
